

Rhodah Mulera

Profile

Mathematics and Computer Science student at JKUAT with hands-on industry experience in frontend development and training in Cloud Computing, Frontend Development, and Graphic Design. Experienced in building responsive web applications and AI agents, user-centered UI/UX design, and technology community leadership, with a strong interest in AI-driven solutions and digital transformation.

Education

- 2023–2027 **BSc Mathematics & Computer Science**, Jomo Kenyatta University of Agriculture and Technology (JKUAT)
2025–2026 **Frontend Pro Development Program**, ALX Africa
2025 **Cloud Computing & Graphic Design Programs**, ALX Africa

Experience

- Jul 2026–Present **UI/UX & Frontend Developer (Intern)**, Truthfuli
- Design and build responsive product interfaces in React from Figma designs, translating wireframes and prototypes into modular, reusable component libraries.
 - Implement analytics dashboard screens (overview and trends views) with a consistent design system, ensuring responsiveness across all breakpoints.
 - Collaborate with the product team on user research, usability testing, and iterative UI improvements.
- Jul–Aug 2026 **Web Developer Attachee**, Red Giant Media Agency, Nairobi, Kenya (Hybrid)
- Led the WordPress cleanup and redesign of the agency website (redgiant.co.ke), including URL remapping and 301 redirects across multiple subdomains to preserve SEO.
 - Built web pages and AI agents to support the agency's marketing and client-acquisition workflows, including a lead-generation tool for sourcing corporate event clients.
 - Set up and structured Google Ads search campaigns by service line to drive qualified enquiries.
- 2025–Present **PR Lead & Technology Coordinator**, GDG on Campus JKUAT
- Coordinated technology events, digital initiatives, and technical documentation.
 - Collaborated with multidisciplinary teams during workshops, hackathons, and innovation programs.
- 2026–Present **UI/UX & Digital Content Coordinator**, Africa's Talking Women in Tech
- Designed digital content, supported user-focused community initiatives, and contributed to testing and improving digital experiences.
- 2023–Present **Frontend Developer**, Freelance & Personal Projects
- Developed responsive web applications using HTML, CSS, JavaScript, React, Git, and GitHub, applying testing, debugging, documentation, and UI/UX best practices.

Projects

- Biashara GPT Kenyan shop assistant powered by Gemini AI and M-Pesa: owners log sales by voice or text, take STK-push payments that reconcile automatically, and get a weekly profit report by SMS. 1st place, Claude Community Kenya Impact Lab hackathon. *Node.js, React, MongoDB Atlas, Gemini API, PayHero, Tiara Connect.*
- Gkash Mobile and web application with a USSD flow that helps gig-economy workers and students build financial literacy, save, invest, and manage their finances on a secure platform.
- Scriptura Paste a YouTube link and get a searchable transcript with optional speaker detection, summaries, chapters, translation, and answers grounded in what was actually said. *Python, FastAPI, yt-dlp, faster-whisper.*

Skills

- Cloud Cloud Computing Fundamentals, Resource Management, Monitoring Concepts
Development HTML, CSS, JavaScript, React, SQL, Python, Git, GitHub, WordPress
UI/UX Figma, Canva, Wireframing, Prototyping, User Research
Technical Documentation, Testing, Debugging, Workflow Mapping, Data Management
Professional Problem Solving, Communication, Teamwork, Research, Adaptability

Certifications & Languages

- Certifications AWS Certified Cloud Practitioner • ALX Frontend Pro Development • ALX Graphic Design
Languages English (Fluent) • Swahili (Fluent) • French (Basic)
